Figure 4

FIG. 5 is a cross-sectional view of the device of FIG. 1, showing the device in a retracted position. The device is shown in a retracted position, with the piston rod 10 and the piston 12 retracted into the cylinder 14. The piston rod 10 is shown in a retracted position, with the piston 12 retracted into the cylinder 14. The piston rod 10 is shown in a retracted position, with the piston 12 retracted into the cylinder 14.
